

INDEPENDENT METHODOLOGY SAMPLE

Online school conversion assessment

A focused review of how an education platform explains its offer, earns trust, and moves prospective students from first visit to enrollment.

PRIORITIZED OUTPUT

01

Understand

Can a first-time visitor explain the program, audience, outcome, and next step?

02

Trust

Does proof appear where doubt is highest, not only on a separate testimonial page?

03

Enroll

Are the decision path, commitment, price context, and application steps predictable?

Important: this document demonstrates the assessment method using a fictional scenario. It is not an audit of a named organization and does not claim client results. Real findings require access to the actual platform, goals, and enrollment journey.

SAMPLE FRICTION MAP

Where enrollment journeys lose momentum

The assessment follows the full decision path. Each issue is tied to a specific user question, a likely business impact, and a concrete correction.

Stage	Visitor question	Typical friction	Recommended direction
Landing	Is this for me?	A broad mission statement delays recognition.	Lead with audience, outcome, and learning format.
Program choice	Which option fits?	Programs look equally important and hard to compare.	Use a simple path based on goal, level, or commitment.
Program page	Can I trust it?	Proof is separated from price and enrollment decisions.	Place outcomes, instructor proof, and FAQs near the CTA.
Application	What happens next?	Forms ask for commitment before setting expectations.	Preview steps, response time, and required information.
Mobile	Can I finish now?	Long pages and dense forms hide the primary action.	Shorten the path and keep one clear action visible.

PRIORITY MODEL

Make the roadmap actionable

P1 - Critical Blocks understanding or enrollment. Fix first, even if the visual change is small.	P2 - High Creates doubt or avoidable effort. Address in the next focused iteration.	P3 - Improve Strengthens consistency and polish after the main decision path works.
--	---	---

Decision rule: impact comes first. Effort is used to sequence the work, not to hide difficult problems.

SEVEN-DAY DELIVERY

From observation to implementation plan

1	Scope and access	Confirm goals, audiences, programs, and the pages in scope.
2-3	Journey review	Inspect desktop and mobile paths from discovery to enrollment.
4	Evidence and scoring	Document issues with screenshots, severity, and rationale.
5	Key-page structure	Draft a wireframe for the page with the highest conversion leverage.
6	Roadmap	Sequence quick wins, structural changes, owners, and dependencies.
7	Review	Walk through findings and answer implementation questions.

DELIVERABLES

A package built for decisions

+ Annotated review of the current experience + Prioritized issue list with impact and effort + Mobile-specific observations	+ Wireframe for one key conversion page + Quick-win checklist + Phased implementation roadmap
---	---

FIXED ASSESSMENT PACKAGE

USD 750

Required to begin

Relevant URLs or platform access, target programs, intended audiences, and the current enrollment goal.
